

AIR QUALITY NONATTAINMENT AREAS (SULFUR DIOXIDE) COMMUNITY INFORMATION SESSIONS San Juan and Guayama-Salinas, Puerto Rico

The U.S. Environmental Protection Agency is holding community information sessions concerning its proposed Finding of Failure to Attain and proposed action on the plan to reduce sulfur dioxide emissions in the San Juan and Guayama-Salinas Nonattainment Areas submitted by the Puerto Rico Department of Natural and Environmental Resources.

The community information sessions will be an opportunity for the public to learn more about this proposal and speak with EPA experts. While the agency can answer your questions about the proposed actions, official comments can only be submitted through the comment form on the Regulations website:

www.regulations.gov/docket/EPA-R02-OAR-2024-0083.
